Author index

Abdalla, O., 19
Adams, K., 249
Alshawi, M.A., 65
Chan, C.M.R., 235
Faulkner, A.C., 155
Gilleard, J., 321
Green, S.D., 53
Handa, V.K., 19
Harris, F.C., 95, 235
Holt, L., 217
Hope, A.E., 65
Hughes, W.P., 29
Ishai, E., 189
Kabasakal, H.E., 347
Kelly, J., 203
Kenley, R., 3
Kim, M.P., 249
Lauttalammi, J., 263, 283
Male, S., 203
Miskawi, Z., 115
Molinski, J., 357
Niskanen, T., 263, 283
Ofori, G., 137
Ogunlana, S.O., 75, 175
Olomolaiye, P.O., 75, 175
Powell, C., 125
Sargent, J.H., 155
Skibniewski, M., 357
Skitmore, R.M., 103
Sozen, Z., 347
Stradling, S.G., 103
Tan, W., 41
Tuohy, A.P., 103
Usdiken, B., 347
Wearne, S.H., 155
Wijesundera, D.A., 95
Wilson, H.A., 303
Wilson, O.D., 3
Winch, G., 331

Construction Management and Economics, 1989, 7, 369–372

Subject index

Accident prevention, materials handling, building construction work, safety, 263
Accident risks, materials handling, building construction work, safety, 283
Administration, project management, leadership, 217
Artifical intelligence, construction management, differing site conditions, expert systems, knowledge acquisition, 249

Bibliographic databases, computer-assisted searching, construction industry, 321
Building construction work, safety, accident prevention, materials handling, 263
Building construction work, safety, accident risks, materials handling, 283
Building design, quality, workload fluctuations, overstraining, slackness, 125
Building process, client organizations, design team, function, cost, value management, 203

Cash flow, net cash flow, estimating, construction management, 3
Civil engineers, construction management, management education, research, 155
Client organizations, design team, function, cost, value management, building process, 203
Closed system, open system, tendering, estimating, tender unbalancing, rationality, environment, 53
Company performance, Turkey, management systems, organizational context, organizational structures, 347
Computer-assisted searching, construction industry, bibliographic databases, 321
Computing, spreadsheets, databases, construction equipment, decision making, 235
Construction, uncertainty, project management, 103
Construction cycle, diversification, subsector, 41
Construction equipment, decision making, computing, spreadsheets, databases, 235
Construction industry, bibliographic databases, computer-assisted searching, 321
Construction industry, systems analysis, environment, Jamaica, 29
Construction management, cash flow, net cash flow, estimating, 3
Construction management, differing site conditions, expert systems, knowledge acquisition, artificial intelligence, 249
Construction management, management education, research, civil engineers, 155
Construction management, tower cranes, materials handling, STELLA, expert systems, dynamic simulation, 95
Construction sites, productivity, management, unit rates, work sampling, regression analysis, learning curves, 19
Contracting system, project uncertainty, contracting uncertainty, transaction costs, project coalition, 331
Contracting uncertainty, transaction costs, project coalition, contracting system, project uncertainty, 331
Contractual disputes, knowledge base, extension of time, expert systems, 65
Cost, value management, building process, client organizations, design team, function, 203

Databases, construction equipment, decision making, computing, spreadsheets, 235
Decision making, computing, spreadsheets, databases, construction equipment, 235

Design, prefabrication, facade components, economics, 189
Design team, function, cost, value management, building process, client organizations, 203
Developing countries, Singapore, Housing and Development Board, resource management, 137
Differing site conditions, expert systems, knowledge acquisition, artificial intelligence, construction management, 249
Diversification, subsector, construction cycle, 41
Dynamic simulation, construction management, tower cranes, materials handling, STELLA, expert systems, 95

Economics, design, prefabrication, facade components, 189
Environment, closed system, open system, tendering, estimating, tender unbalancing, rationality, 53
Environment, Jamaica, construction industry, systems analysis, 29
Equipment, method, output, time study, 75
Estimating, construction management, cash flow, net cash flow, 3
Estimating, tendering, tender unbalancing, rationality, environment, closed system, open system, 53
Expert systems, contractual disputes, knowledge base, extension of time, 65
Expert systems, dynamic simulation, construction management, tower cranes, materials handling, STELLA, 95
Expert systems, knowledge acquisition, artificial intelligence, construction management, differing site conditions, 249
Extension of time, expert systems, contractual disputes, knowledge base, 65

Facade components, economics, design, prefabrication, 189
Function, cost, value management, building process, client organizations, design team, 203

Housing and Development Board, resource management, lessons, developing countries, Singapore, 137
Hyper-productivity, productivity, operatives, motivation, system, 175

Jamaica, construction industry, systems analysis, environment, 29

Knowledge acquisition, artificial intelligence, construction management, differing site conditions, expert systems, 249
Knowledge base, extension of time, expert systems, contractual disputes, 65

Leadership, administration, project management, 217
Learning curves, construction sites, productivity, management, unit rates, work sampling, regression analysis, 19
Lessons, developing countries, Singapore, Housing and Development Board, resource management, 137

Management, unit rates, work sampling, regression analysis, learning curves, construction sites, productivity, 19
Management education, research, civil engineers, construction management, 155
Management systems, organizational context, organizational structures, company performance, Turkey, 347
Materials handling, building construction work, safety, accident prevention, 263
Materials handling, building construction work, safety, accident risks, 283
Materials handling, STELLA, expert systems, dynamic simulation, construction management, tower cranes, 95
Method, output, time study, equipment, 75
Motivation, system, hyper-productivity, productivity, operatives, 175

Net cash flow, estimating, construction management, cash flow, 3

Open system, tendering, estimating, tender

unbalancing, rationality, environment, closed system, 53
Operatives, motivation, system, hyper-productivity, productivity, 175
Organizational context, organizational structures, company performance, Turkey, management systems, 347
Organizational structures, company performance, Turkey, management systems, organizational context, 347
Output, time study, equipment, method, 75
Overstraining, slackness, building design, quality, workload fluctuations, 125

Prefabrication, facade components, economics, design, 189
Productivity, management, unit rates, work sampling, regression analysis, learning curves, construction sites, 19
Productivity, operatives, motivation, system, hyper-productivity, 175
Project coalition, contracting system, project uncertainty, contracting uncertainty, transaction costs, 331
Project management, construction, uncertainty, 103
Project management, leadership, administration, 217
Project management, *S*-curve equation, shape factor, 115
Project uncertainty, contracting uncertainty, transaction costs, project coalition, contracting system, 331

Quality, workload fluctuations, overstraining, slackness, building design, 125

Rationality, environment, closed system, open system, tendering, estimating, tender unbalancing, 53
Regression analysis, learning curves, construction sites, productivity, management, unit rates, work sampling,19
Research, civil engineers, construction management, management education, 155
Resource management, lessons, developing countries, Singapore, Housing and Development Board, 137

Safety, accident prevention, materials handling, building construction work, 263
Safety, accident risks, materials handling, building construction work, 283
S-curve equation, shape factor, project management, 115
Shape factor, project management, *S*-curve equation, 115
Singapore, Housing and Development Board, resource management, lessons, developing countries, 137
Slackness, building design, quality, workload fluctuations, overstraining, 125
Spreadsheets, databases, construction equipment, decision making, computing, 235
STELLA, expert systems, dynamic simulation, construction management, tower cranes, materials handling, 95
Subsector, construction cycle, diversification, 41
System, hyper-productivity, productivity, operatives, motivation, 175
Systems analysis environment, Jamaica, construction industry, 29

Tender unbalancing, rationality, environment, closed system, open system, estimating, tendering, 53
Tendering, tender unbalancing, rationality, environment, closed system, open system, estimating, 53
Time study, equipment, method, output, 75
Tower cranes, materials handling, STELLA, expert systems, dynamic simulation, construction management, 95
Transaction costs, project coalition, contracting system, project uncertainty, contracting uncertainty, 331
Turkey, management systems, organizational context, organizational structures, company performance, 347

Uncertainty, project management, construction, 103
Unit rates, work sampling, regression analysis, learning curves, construction sites, productivity, management, 19

Value management, building process, client organizations, design team, function, cost, 203

Workload fluctuations, overstraining, slackness, building design, quality, 125
Work sampling, regression analysis, learning curves, construction sites, productivity, management, unit rates, 19
